## PROJECTS

Small list of project that I enjoy working on my free time

**Secret Santa** - This project started as an personal project to learn golang, as I'm not that good with frontend design and development, my friend is helping with frontend.

**Golang Tools** - A collection of tools that I wrote in golang, some of them are still a work-in-progress, but most of them have helped me out in a tight situation.

**HomeLAB** - A project that almost every self-respecting tech enthusiast has, this project is never completed, it is always in a constant state of flux.
